Business Idea Evaluation

Criterion	Factors to be Evaluated
1. Perfect personal match	• I like the idea. I can do it joyfully • A business based on the idea is compatible with my dream • My family likes it • My skills match with the idea
2. Innovativeness / Uniqueness	• New to the market • Difficult to copy
3. Market	• It is easy to find customers. • There is a sizeable market. It is expanding • I can reach the market easily • Customers don't grumble about the market price • Easy to formulate marketing strategies
4. Competition	• Competition is not heavy • I know the details of the competitors • I will have competitive advantages
5. Technology & Equipment	• It is easy to acquire technology • I know how to get technology • Obtaining equipment is easy
6. Production easiness (Operation in case of a service)	• Raw material is available freely. • The production process is not complicated. • Production infrastructure can be arranged easily. • No scarcity of production inputs.
7. Human resource	• Skilled human resources are available. • Employee demands can be met. • I have an idea about the HR requirement
8. Environmental protection	• Environmental restrictions are less. • This business doesn't harm the environment. • Environmental-related risks are less. • Obtaining environmental clearance is easy.
9. Capital	• This idea needs less capital. • Sources are available to find capital needs.
10. Government support	• Government support schemes are available. • Idea belongs to a priority industry sector.

No	Business Idea	Perfect Personal match	Innovativeness / Uniqueness	Competition	Technology & Equipment	Production easiness	Marketing	Human resource	Environmental protection	Capital	Government Priorities	Total Marks	Rank

1. Executive Summary

(Complete this section after you have completed the other sections of the Business Plan)

YouthFin is an innovative financial technology platform designed to promote financial literacy and independence among children and teenagers. The system aims to bridge the gap between banks, families, and young users by introducing goal-based saving, smart spending, and early financial education through a safe, supervised digital environment. It addresses the growing need for youth focused financial empowerment in Sri Lanka by combining technology, learning, and responsible money management in one ecosystem.

Business Overview:
YouthFin provides a digital platform connected with partner banks to create smart child accounts under parental supervision. These accounts allow children to set financial goals, save, and even access small supervised micro-loans for educational or personal purposes. The platform also partners with merchants such as bookstores, electronic retailers, and education service providers to offer exclusive discounts and reward-based purchases. In addition, it includes an in-app learning space where financial lessons and quizzes help kids understand saving, credit, and investing in a fun and interactive way.

Key Objectives:

- To build partnerships with leading banks and schools across Sri Lanka within the first year of operation.
- To empower children and teenagers to manage their money responsibly through goal-based saving and learning tools.
- To promote financial literacy as a national priority by working with educational institutions and government programs.
- To ensure every young user can experience safe, supervised access to digital finance and responsible credit.

Market Opportunity:
Financial education and youth banking are emerging as strong global trends. In Sri Lanka, over 4 million students below the age of 18 have limited access to modern banking tools or real-world financial experiences. YouthFin targets this under-served segment by offering a bridge between banks, parents, and youth through technology and gamified learning. With increasing smartphone penetration and awareness of digital finance, the potential market for YouthFin is rapidly expanding.

Competitive Advantage:
YouthFin stands out as Sri Lanka's first fintech platform built specifically for minors. While banks currently provide traditional savings accounts for children, they lack interactivity and real engagement. YouthFin's smart goal-setting system, financial education tools, and merchant partnerships create a complete digital ecosystem. The platform's supervised structure also ensures safety and trust for parents while giving children controlled financial freedom.

Financial Overview:
Revenue will be generated through merchant commissions, subscription plans for families, referral partnerships with banks, and ethical in-app advertisements. Initial growth is expected through collaborations with schools and banks in major cities. Over the first three years, YouthFin aims for steady revenue growth as user adoption increases across educational and retail sectors.

Future Vision:

In five years, YouthFin aims to become Sri Lanka's leading youth financial ecosystem, empowering over one million young users to save, spend, and learn responsibly. The long-term goal is to expand across South Asia, partnering with banks and education systems in the region. By promoting early financial literacy, YouthFin will contribute to building a generation that is confident, responsible, and financially independent.

2. Entrepreneur's Profile and Business Details

***a.* Business Name**	YouthFin		
***b.* Business Contact Details**			
Address	Malabe, Colombo		
Telephone	0778526449	Fax	0112636345
Email	info@youthfin.lk	URL / FB	youthfin.lk
***c.* Year of Establishment**	2025		
***d.* Number of Employees**	10-20		
***e.* Registration Number, Date of Registration & Registering Authority (if Registered)**	**Registration in process**		

***f.* Name of the Owner / Directors**	**Share %**	**Role/ Responsibility**
I. Shangeetha J	40%	Chief Executive Officer (CEO) **Responsibilities**: • Develops and oversees YouthFin's overall business strategy and growth vision. • Leads partnerships with banks, schools, and merchants. • Manages stakeholder relationships and investor communications. • Provides leadership direction to all departments and ensures alignment with company goals. • Focuses on long-term sustainability and regional expansion
II. Niruththika E	30%	Chief Technology Officer (CTO) **Responsibilities:** • Leads all technical operations, including system architecture, mobile app development, and platform maintenance. • Ensures data security, privacy, and compliance with fintech regulations. • Guides innovation and integration with partner bank systems. • Oversee the deployment of new digital tools and AI-based financial literacy modules.

III. Abiramy T	30%	Chief Operating Officer (COO) **Responsibilities** • Manages daily operations, including customer support and onboarding. • Oversees service quality, process optimization, and compliance. • Coordinates with the technology and marketing teams to improve efficiency. • Ensures smooth collaboration between merchant partners and bank networks.

***g.* Key Stakeholders of the Business**	

I. Family Information (Family Members, Occupations and Contribution to the Business)	**Shangeetha J** Brings leadership experience in innovation and technology management. She oversees business strategy, investor relations, and institutional partnerships. Her vision focuses on empowering Sri Lankan youth through financial literacy and digital inclusion. **Niruththika E** Responsible for leading software development, app maintenance, and cybersecurity operations. Her technical expertise ensures the YouthFin platform remains secure, scalable, and user-friendly **Abiramy T** With strong organizational and project management skills, she manages the operational workflow, customer support structure, and partnership execution with banks and merchants.

II. Key Customers (Individual and Business)	**1. Schools and Educational Institutions (Business)** Partner schools integrate YouthFin to teach students digital financial literacy and savings discipline through controlled youth accounts. **2. Banks and Financial Partners (Business)** Partner banks such as Commercial Bank and HNB collaborate with YouthFin to promote financial inclusion and early savings habits among youth customers. **3. Parents and Teenagers (Individual)** Parents use YouthFin to monitor and guide their children's spending and saving goals, while teenagers use it to set
III. Key Suppliers	**1. TechNova Solutions (Service Provider)** Provides the cloud hosting, payment gateway integration, and data analytics services necessary for YouthFin's daily operations. **2. DigiSecure Systems (Product Supplier)** Supplies the data encryption modules, security APIs, and compliance tools to ensure safe transactions and privacy protection. **3. MediaEdge Marketing (Creative Partner)** Supports YouthFin's promotional campaigns, video content, and brand design for youth engagement across digital platforms.

h. Entrepreneur's Profile

(Entrepreneur's business background, experiences, qualifications, and special training received)

Shangeetha J

Entrepreneur Shangeetha J is an expert in business innovation and leadership, with a solid background in technology-driven management and strategic development. She graduated with a Bachelor's Degree in Business Management from SLIIT, where she specialized in Innovation and Entrepreneurship.

Shangeetha J co-founded YouthFin – The Youth Finance Platform with a vision to empower Sri Lankan youth through financial literacy and smart money management. As the Chief Executive Officer (CEO), he plays a leading role in defining the company's strategy, partnerships, and long-term direction.

Business Strategy:
She is responsible for setting YouthFin's overall strategic plan, aligning its objectives with opportunities in digital banking and youth empowerment. her strong strategic insight and market understanding guide the platform toward sustainable growth.

Partnership Development:
She collaborates closely with banks, schools, and merchants to create long-term partnerships that benefit all stakeholders. She is experienced in business-to-business (B2B) collaboration helps YouthFin build trust and credibility within the financial and education sectors.

Stakeholder Management:
She manages relationships with key partners and investors, ensuring open communication and collaboration to achieve the company's objectives.

Leadership:
Shangeetha's leadership style focuses on innovation, teamwork, and continuous improvement. Her commitment to education and youth empowerment drives the company's mission to make financial learning accessible to every child in Sri Lanka.

Niruththika E

Entrepreneur Niruththika E has strong experience in software engineering, data analytics, and fintech development. She holds a bachelor's degree in information technology (Software Engineering) from SLIIT, where she gained expertise in cybersecurity, mobile development, and data protection systems.

As the Chief Technology Officer (CTO) of YouthFin, Niruththika E plays a vital role in the technological innovation and maintenance of the platform.

Technological Leadership:
She leads the app's design, development, and security integration, ensuring YouthFin remains a secure, scalable, and user-friendly digital platform.

Platform Development:
She manages system architecture, backend maintenance, and new feature rollouts. Her goal is to ensure smooth integration between YouthFin and partner bank systems.

Innovation:
She continuously improves the platform by incorporating technologies such as AI-driven financial advice and goal-based savings tracking, keeping YouthFin ahead in fintech innovation.

Data Security:
She ensures user information is fully encrypted and protected under data privacy standards, maintaining compliance with financial sector guidelines.

Abiramy T

Entrepreneur Abiramy T is an expert in operations management with a strong foundation in business administration and project coordination. She holds a Bachelor's Degree in Business Administration from SLIIT, where she developed expertise in business process optimization and customer relationship management.

As the Chief Operating Officer (COO) of YouthFin, she ensures the smooth running of daily operations and the effective delivery of services.

Operational Management:
Abiramy T oversees all operational activities, including app performance, financial transactions, and service quality. She ensures the platform runs efficiently and meets user expectations.

Client Services:
She manages customer engagement, ensuring that both parents and youth users receive the support they need to fully utilize YouthFin's platform and features.

Regulatory Compliance:
She ensures YouthFin adheres to Sri Lanka's financial and data protection regulations, maintaining trust and integrity in all operations

***i.* Business Idea and Justification**

Business Idea

YouthFin – The Youth Finance Platform is an innovative digital fintech solution designed to promote financial literacy, savings discipline, and responsible spending habits among children and teenagers in Sri Lanka.
The platform provides smart sub-accounts linked to parents' bank accounts, enabling controlled savings, spending, and goal tracking. Through gamified learning modules, micro-investment options, and merchant reward partnerships, YouthFin bridges the gap between financial education and real-life money management for the younger generation.

The platform is accessible through a mobile application and web dashboard, integrating features such as:

- Goal-based savings and digital allowances under parental control.
- Reward programs with partnered merchants and educational institutions.
- Micro-finance and youth credit builder options for older teens.

- Interactive financial literacy lessons designed for students.

Justification

In Sri Lanka, most youth lack access to structured financial education and practical tools to learn about saving, budgeting, and digital transactions. Existing minor accounts in banks only allow deposits and limit withdrawals until age 18, preventing children from actively engaging in financial decision making.

At the same time, increasing smartphone penetration, digital payment adoption, and the government's focus on Digital Economy and Financial Inclusion create a strong foundation for an app like YouthFin.

YouthFin addresses these gaps by:

- Empowering youth to learn financial responsibility through real-world practice.
- Supporting parents with tools to monitor, guide, and reward their children's progress.
- Partnering with banks and merchants to create a sustainable ecosystem that benefits all stakeholders.
- Aligning with national initiatives such as the Central Bank's Financial Literacy Program and ICTA's Digital Sri Lanka strategy.

Social and Economic Impact

- Promotes financial discipline and inclusion among school-age youth.
- Encourages cashless transactions and digital banking adoption.
- Provides long-term customer retention opportunities for banks and merchants.
- Helps build a financially responsible generation, contributing to national economic development.

***j.* Start-up Summary / Current Status**

The YouthFin – Youth Finance Platform project is currently in the development and early partnership phase, with steady progress made across all core areas of product design, technical implementation, and collaboration

Research and Planning

Extensive research has been conducted on financial literacy trends and youth banking limitations in Sri Lanka. The findings highlight a clear need for a digital solution that helps children and teenagers learn money management through practical engagement.
Our team analyzed existing minor savings account systems offered by major banks and identified a significant gap — most options allow deposits only and provide little opportunity for financial learning or parental monitoring.
The outcome of this research validated YouthFin's unique focus on education-driven fintech, combining gamified learning with real financial tools.

Technical Development

The core platform design and application architecture have been developed. Current progress includes:

- Design and development of smart youth sub-accounts linked to parent or guardian accounts.
- Integration of goal-based saving and reward management systems.
- Implementation of secure transaction monitoring and data encryption frameworks to ensure full privacy compliance.
  The prototype version of the YouthFin app is under testing, focusing on user interface design, dashboard features, and mobile compatibility.

Partnership Discussions

We have initiated partnership discussions with several local banks, educational institutions, and retail merchants. Early feedback has been highly encouraging — multiple banks have shown interest in offering YouthFin as a co-branded youth banking solution, and several schools have agreed to participate in pilot programs once testing is complete.

Additionally, collaboration talks are ongoing with merchant partners such as bookstores, gadget retailers, and tuition centers to enable discount and reward integration through the app.

Funding and Resources

YouthFin is currently seeking funding through a mix of start-up grants, private investors, and strategic partnerships with banks. The initial development phase has been supported by the founding team's own investment and academic resources.
We have outlined a 12-month implementation plan for platform completion, pilot testing, and full public launch. As the project scales, we aim to expand our team with experts in cybersecurity, marketing, and digital education.

How do you want to see your business after 05 years from now?

In five years, YouthFin aims to become Sri Lanka's leading youth-focused financial education and fintech platform, empowering thousands of students to make informed and responsible financial decisions. Our goal is to transform how young people learn, save, and manage money by blending technology, education, and real-world financial experience.

By 2030, we envision YouthFin as:

1. A Nationwide Digital Platform:
   YouthFin will be fully integrated with major banks, schools, and educational institutions across Sri Lanka, offering digital youth accounts to over 200,000 active users (students and parents).

2. A Regional Fintech Innovator:
   We plan to expand into other South Asian markets such as India, Bangladesh, and the Maldives, adapting our platform to local financial systems while maintaining our educational focus.

3. A Trusted Partner for Financial Institutions:
   YouthFin will work alongside banks, government programs, and NGOs to promote national financial inclusion goals and help establish financial literacy as a part of school curriculums.

4. An AI-Driven Learning Ecosystem:
   Our platform will feature AI-powered financial coaching, personalized saving suggestions, and interactive learning tools to enhance engagement and impact among youth users.

5. A Socially Responsible Brand:
   YouthFin will continue to support community programs, financial literacy workshops, and school partnerships that uplift underprivileged students, promoting equal access to digital finance education.

3. Vision, Mission and Objectives

a. **Vision**

"To empower the next generation with financial literacy and independence through a smart, secure, and engaging digital financial ecosystem**."**

b. **Mission**

"To bridge the financial literacy gap among children and teenagers by connecting banks, families, and merchants on a single platform that promotes responsible saving, goal-based learning, and supervised financial experiences**."**

c. Objectives

i. Develop Smart Youth Accounts: Partner with banks to create secure child-linked accounts that allow goal-based saving and controlled spending

ii. Promote Financial Literacy: Integrate gamified learning modules to teach children the basics of money management, saving, and credit.

iii. Build Strong Partnerships: Collaborate with educational institutions, merchants, and financial partners to expand the YouthFin ecosystem

iv. Encourage Responsible Finance: Help young users learn financial discipline by offering supervised micro-loans and reward-based saving programs.

v. Expand Financial Inclusion: Make digital financial tools accessible to all Sri Lankan youth, regardless of their socio-economic background.

d. **Values**

- **Financial Responsibility:** We believe in helping the next generation learn the value of money through practical, hands-on experiences.

- **Security and Trust:** We ensure all financial activities are conducted in a safe, transparent, and parent-supervised environment.

- **Innovation:** We continuously evolve with technology to provide smarter, more engaging financial tools for young users.
- **Education and Empowerment:** We are committed to improving youth financial literacy by making learning interactive, enjoyable, and impactful.

- **Accessibility:** We aim to make financial education and services available to every child, everywhere, through simple and inclusive digital solutions.

4. Marketing Plan

Market Growth & Trends:

What recent trends have emerged in the market? What growth potential is available and where do you fit in? How will the market/customers change when you enter the market?

Recent Trends:

1. **Rise of Digital Banking for Youth:**
   Financial institutions are increasingly focusing on youth-oriented digital products to attract the next generation of customers early. However, most existing youth accounts only allow savings, not interactive financial learning a gap YouthFin directly fills.

2. **Growing Interest in Financial Literacy:**
   There's a global movement toward improving financial education among children and teenagers. Schools, parents, and governments are recognizing that early money management skills are essential for future financial stability. YouthFin aligns with this trend by combining financial learning with real-world practice.

3. **Expansion of Fintech and Cashless Ecosystems:**
   With the rise of digital wallets and mobile banking in Sri Lanka, families are becoming more comfortable with online finance. YouthFin builds on this trend by introducing a safe, supervised version for kids and teens, connecting them to the growing fintech ecosystem.

4. **Gamification in Learning:**
   Modern users prefer interactive, engaging experiences over traditional lessons. YouthFin integrates gamification into saving and learning, keeping young users motivated while improving their financial habits.

Growth Potential:

The fintech market in Sri Lanka is growing rapidly, driven by smartphone adoption, online banking, and cashless transactions. According to industry reports, digital finance adoption among youth is expected to double within the next five years.

YouthFin is perfectly positioned to tap into this growth by addressing two emerging needs:

- The need for youth-friendly financial tools that are safe, educational, and parent-approved.

- The need for financial literacy programs that go beyond theory, offering real money management experiences.

In the long term, YouthFin can expand into related areas such as micro-investments for students, scholarship-linked savings plans, and school-based digital banking partnerships, making the platform highly scalable and sustainable.

Market Impact

- **Improved Financial Awareness:** YouthFin will help children and teenagers develop strong financial habits early, teaching them how to save, plan, and manage money responsibly through real-life, gamified experiences.

- **Empowered Families:** Parents will gain greater control and transparency over their children's financial activities while encouraging healthy saving behaviors at home.

- **Financial Inclusion:** By collaborating with banks and schools, YouthFin brings modern financial tools to students in both urban and rural areas, supporting Sri Lanka's national goal of digital and financial inclusion.

- **Long-Term Value Creation:** The platform builds future-ready customers for banks and merchants, helping the financial ecosystem grow sustainably while promoting responsible finance among youth.

Customers

Customer Demographics

Define who your target customers are and how they behave. You can include age, gender, social status, education and attitudes.

YouthFin's customer base includes families, students, schools, and financial institutions across Sri Lanka:

- **Parents and Guardians:** Adults aged 28–50, who value financial education and want to teach their children responsible saving habits. Most are middle-income earners with access to smartphones and digital banking.

- **Children and Teenagers (Ages 10–18):** Young users eager to save for personal goals such as laptops, sports equipment, or educational tools. They are digital natives who enjoy interactive, gamified learning and mobile apps.

- **Banks and Financial Partners:** Financial institutions aiming to attract the next generation of lifelong customers and improve youth engagement through digital solutions.

Customer Retention

How will you maintain a good relationship with your customers? What methods will you use? How will you keep your customers coming back? Have you introduced customer service standards?

- **Excellent Customer Support:** YouthFin offers continuous technical and customer support for parents, schools, and financial partners. Our in-app help center and chatbot ensure quick assistance.

- **Regular Updates and Improvements:** The platform is frequently upgraded with new features, games, and learning modules to keep users engaged and satisfied.

- **Feedback and Community Building:** We maintain a strong feedback system where users can share ideas and experiences. Suggestions are reviewed and implemented to improve functionality and user experience.
- **Gamified Engagement:** Children earn badges, progress levels, and real rewards for completing saving goals or financial learning modules, motivating consistent participation.
- **Customer Service Standards:** We focus on quick response times, personalized communication, and a simple interface that both kids and parents can easily understand.
- **Loyalty and Partnership Programs:** YouthFin offers long-term benefits such as discounts for continuous subscriptions, school referral programs, and reward multipliers for partner banks and merchants.

Market Expansion

Target market and market expansion strategies, how are you going to penetrate into the market (Segmentation, targeting, positioning)

Target Market

1. Primary Segment: Parents and guardians who want to teach their children responsible saving and financial management through a secure, supervised platform. These users value financial discipline, transparency, and long-term benefits for their children.

2. Secondary Segment: Children and teenagers aged 10–18 who are eager to achieve their personal saving goals, such as buying gadgets, school equipment, or sports gear. They are digitally active, enjoy gamified learning, and are motivated by rewards and achievements.

3. Tertiary Segment: Banks, schools, and merchants interested in youth engagement, brand loyalty, and promoting financial inclusion.

Market Expansion Strategies

Segmentation:
YouthFin's market is segmented based on user groups (parents, youth, and institutions), regions (urban, semi-urban, rural), and partnership opportunities (banks, schools, and retail merchants).

Targeting:
Initially, the focus will be on urban families and schools with high smartphone adoption rates, then expand to semi-urban and rural schools through government and NGO collaborations. The app will also target forward-thinking banks that are open to innovation in digital youth banking**.**

Positioning:
YouthFin will be positioned as Sri Lanka's first youth-focused financial learning and saving platform, combining education, technology, and smart money management. The brand image will emphasize trust, safety, and empowerment "Smart Banking for Smart Kids."

Competitive Edge

What is your competitive edge of your products / services, marketing & distribution compared to the other competitors in the market?

- **First-Mover Advantage:** YouthFin is the first digital platform in Sri Lanka designed exclusively for minors, combining savings, financial education, and merchant rewards in one ecosystem.

- **Bank Integration:** The platform directly integrates with partner banks to create real financial accounts under parental supervision a feature not offered by existing fintech or e-learning apps.

- **Gamified Financial Education:** YouthFin's interactive lessons, quizzes, and challenges make learning about money fun and engaging, keeping users motivated and active.

- **Secure and Supervised:** Every transaction is monitored and approved by parents or guardians, ensuring safety, trust, and responsible use.

- **Community and Loyalty:** Through partnerships with schools and merchants, YouthFin builds long-term relationships and offers continuous rewards, ensuring customer retention and steady platform growth.

Promotion and Advertising

How are you going to advertise / promote your product to your customers?

- **School Campaigns and Workshops:** Conduct financial literacy workshops and awareness sessions at schools to introduce YouthFin to students, teachers, and parents.

- **Digital Marketing:** Promote through social media, influencer partnerships, and targeted online ads to reach families and youth audiences.

- **Bank and Merchant Collaborations:** Partner with banks, bookstores, gadget shops, and tuition centers to promote co-branded financial offers and exclusive discounts for YouthFin users.

- **Content Marketing:** Publish engaging articles, tips, and videos on money management for families and students through the YouthFin blog and YouTube channel.

- **Public Relations:** Collaborate with the Central Bank and Ministry of Education for financial literacy drives and youth development campaigns, strengthening brand credibility.

Sales and Distribution
How are you going to sell your product to your customers?

- **School Campaigns and Workshops:** Conduct financial literacy workshops and awareness sessions at schools to introduce YouthFin to students, teachers, and parents.
- **Marketing:** Promote through social media, influencer partnerships, and targeted online ads to reach families and youth audiences.
- **Bank and Merchant Collaborations:** Partner with banks, bookstores, gadget shops, and tuition centers to promote co-branded financial offers and exclusive discounts for YouthFin users.
- **Content Marketing:** Publish engaging articles, tips, and videos on money management for families and students through the YouthFin blog and YouTube channel.
- **Public Relations:** Collaborate with the Central Bank and Ministry of Education for financial literacy drives and youth development campaigns, strengthening brand credibility.

5. Production Plan

a. What is / are the Improvement Suggested Exiting Technology / Process

The introduction of a centralized youth financial management platform that connects children, parents, banks, and merchants is the recommended enhancement for the current financial education and youth savings process.

Instead of relying on traditional minor accounts that only allow deposits, YouthFin provides an integrated, secure, and engaging digital platform that supports goal-based saving, supervised spending, and financial literacy. This innovation transforms how young people learn, save, and interact with financial systems from an early age. **1. Essential Elements**

Several essential components are involved in the creation and operation of the YouthFin platform:

- **Mobile & Web Application Development:**
  Building an interactive, user-friendly application where children can set saving goals, track progress, and complete gamified financial lessons.
- **Bank API Integration:**
  Creating secure APIs to connect YouthFin with partner banks, allowing real-time deposits, parental approvals, and transaction tracking.
- **Micro-Financing Module:**
  Developing a controlled system that enables small, supervised loans for verified youth users, helping them learn responsible credit management.
- **Merchant & Partner Network:**
  Integrating an ecosystem of verified merchants (e.g., bookstores, electronics shops, tuition centers) that offer discounts and reward-based purchases through YouthFin.
- **Financial Literacy Gamification:**
  Designing in-app educational challenges, badges, and lessons that make learning about saving, credit, and budgeting engaging and fun.
- **Data Security & Parental Control System:**
  Implementing high-level encryption, user verification, and parental dashboards to ensure safe and supervised financial activities.

2. Production Process

The YouthFin production process consists of three major phases, each focusing on technology development, testing, and deployment.

Phase 1: Software Development

- **Requirement Gathering:**
  Collect requirements from banks, schools, merchants, and families to understand system needs and user expectations.
- **Backend Development:**
  Use secure and scalable cloud technologies (e.g., Node.js, MongoDB, AWS) to build the backend system that supports transactions, data analytics, and integrations.
- **Frontend Development:**
  Develop a responsive mobile and web interface designed for simplicity and accessibility for children, parents, and partners.
- **Testing and Quality Assurance:**
  Conduct rigorous testing for security, data accuracy, and usability to ensure compliance with financial regulations and smooth user experiences.

Phase 2: Integration with Banks and Merchants

- **API & Payment Gateway Integration:**
  Establish secure communication channels between YouthFin, partner banks, and merchant systems to enable real-time transactions.
- **Partnership Onboarding:**
  Collaborate with financial institutions, educational partners, and stores to test the system in real use cases before mass rollout.
- **Security & Compliance Testing:**
  Validate all modules against banking security standards, ensuring data privacy and financial safety for minors.

Phase 3: Deployment and Scaling

- **Pilot Launch:**
  Launch YouthFin in selected schools and banking partners in Colombo and major cities for user feedback and refinement.
- **Full Deployment:**
  After successful testing, expand access nationwide, integrating additional banks, schools, and merchants.
- **Maintenance and Upgrades:**
  Continuously improve features, fix bugs, and introduce new gamified financial education modules to keep the platform fresh and engaging.

***b*. Production Process / Service Process**

Detail out your production / Service Process and illustrate flow diagram in displaying all steps of production process / service process

The **YouthFin service process** is centered on developing and maintaining a secure, user-friendly, and scalable financial education and savings platform for children and teenagers. It involves continuous collaboration between the development team, financial institutions, educational partners, and merchants.
The following steps outline the entire process:

1. User Registration and Account Setup
Parents or guardians create YouthFin family accounts via the app or website. Each child's profile is linked to the parent's main account and connected to a partner bank through secure APIs. The account setup includes user verification and parental consent.

2. Goal-Based Saving and Learning Module Activation
After registration, children can set personalized saving goals (for example, saving for a laptop worth LKR 150,000). The system automatically calculates saving targets and tracks progress. At the same time, users unlock gamified financial education modules to improve their knowledge.

3. Integration with Banks and Merchants
YouthFin connects with banks to manage secure deposits and withdrawals under parental supervision. Partner merchants such as bookstores, gadget sellers, and tuition centers offer exclusive discounts and rewards for YouthFin users. Transactions and rewards are managed through the integrated system.

4. Reward and Micro-Financing System
Once users show consistent saving and learning habits, they become eligible for small, supervised micro-loans. Parents co-sign these transactions, teaching responsible borrowing and repayment behavior while maintaining full transparency.

5. Data Security, Maintenance, and Support
The platform undergoes regular updates to maintain security, fix bugs, and introduce new features. Continuous technical support and customer assistance ensure smooth operation for users, banks, and schools.

c. Factory / Business Premises Layout

As YouthFin is a digital fintech platform, no physical factory is required. However, the company will maintain a central operational and development center that supports system development, security, and customer service.
The business premises will include:

- **Software Development Division:** Focused on app design, backend systems, and continuous improvement.
- **Server and Security Room:** Dedicated space for managing cloud servers and monitoring cybersecurity.
- **Customer Support Area:** For handling inquiries from parents, schools, and partners.
- **Meeting and Training Room:** Used for staff collaboration, partner onboarding, and internal training.

d. New Equipment, Plant and Machineries Needed and Cost

Cost and Requirement for New Equipment, Plants, and Machinery

1. Cloud Infrastructure and Servers:
   Required to host the YouthFin platform securely, manage user data, and support online transactions. Includes cloud database services, server hosting, and data backup systems.
   Cost Estimate: LKR 1,500,000
2. Software Development Tools and Licenses:
   Necessary for building and maintaining the YouthFin web and mobile applications. Includes software frameworks, API integrations, development environments, and payment gateway licenses.
   Cost Estimate: LKR 4,000,000
3. Cybersecurity Systems:
   Essential for data protection and financial transaction security. Covers firewalls, encryption tools, and fraud prevention software to ensure user privacy and trust. Cost Estimate: LKR 1,000,000
4. Office Equipment and IT Workstations:
   Includes computers, networking devices, routers, communication tools, and accessories required for developers, marketing teams, and customer service operations.
   Cost Estimate: LKR 3,000,000
5. Testing and Quality Assurance Tools:
   Tools and environments used for performance testing, app debugging, and continuous integration to ensure the platform runs smoothly across devices. Cost Estimate: LKR 500,000
6. Customer Support and CRM System:
   Includes a cloud-based helpdesk and customer relationship management software to manage user queries, merchant support, and issue tracking. Cost Estimate: LKR 1,000,000
7. Office Setup and Utilities:

Covers furniture, communication systems, and office utilities for the startup's operation base. Cost Estimate: LKR 2,000,000

e.* Production Cost *Calculation

Direct Cost	*Last Year*	*Year 1*	*Year 2*	*Year 3*
A. Material	-	4,380,000	5,330,000	6,320,000
B. Labour	-	5,400,000	5,670,000	5,953,500
C. Other	-	540,000	660,000	780,000
D. Total Direct Cost **(A + B + C)**	-	10,320,000	11,660,000	13,053,500
E. Production Overheads				
F. Electricity	-	120,000	150,000	180,000

H. Fuel & Energy	-	90,000	100,000	120,000
I. Transport	-	180,000	210,000	240,000
J. Other	-	300,000	360,000	420,000
K. Total Overheads **(F + G + H + I + J)**	-	726,000	862,000	1,008,000
Total Production Cost (D + K)	-	11,046,000	12,522,000	14,061,500

6. Administration s Management Plan

a. Location of the Business

Location of the main business and location branches / factory if any

The main headquarters of YouthFin (Pvt) Ltd. will be in Colombo, the financial and technological hub of Sri Lanka. This central location allows easy access to banks, schools, and potential investors.
The platform will operate primarily online to ensure accessibility for users across the country. As the business grows, satellite offices may be established in cities such as Kandy and Galle to support local partnerships, school campaigns, and customer outreach programs.

b. Organization Structure

Chief Executive Officer (CEO) - Responsible for overall business strategy, partnerships with banks, schools, and investors, and guiding the long-term vision of YouthFin.

Chief Technology Officer (CTO) - Oversees app and backend development, ensures system security, and manages integration with financial and merchant partners.

Chief Operating Officer (COO) - Handles day-to-day business operations, customer support, and coordination between departments.

Marketing Manager - Leads promotional campaigns, branding, and digital marketing strategies to attract users and partners.

Finance Manager - Manages accounts, budgeting, cash flow, and financial compliance**.**

Software Developers & UI/UX Designers - Develop and maintain the YouthFin mobile and web applications.

Customer Support Team - Provides assistance to users, parents, and partners through online and phone based support channels.

Administrative Staff - Responsible for HR management, scheduling, and internal coordination.

c. Legal & Environmental Requirement related to the Business

Legal:
YouthFin will comply with financial and data protection laws of Sri Lanka, including regulations set by the Central Bank of Sri Lanka (CBSL) and the Personal Data Protection Act (PDPA) of 2022. All financial operations will be conducted under approved bank partnerships and monitored for child protection and online transaction safety.

Environmental:
As a fully digital platform, YouthFin has a minimal environmental footprint. The company is committed to sustainable business practices, reducing paper usage, and promoting eco-friendly digital solutions in schools and partner institutions.

d. Brand names/ Copyrights/ Patents

- The brand name "YouthFin" will be trademarked to protect brand identity and prevent unauthorized use.
- Copyrights will be obtained for the YouthFin software, website design, and gamified financial learning content.
- Patents may be filed for the unique financial education gamification system and secure youth parent transaction monitoring process developed by the company.

e. Insurance

- Comprehensive business insurance will be obtained to protect the company against risks such as cyber threats, data breaches, and operational downtime.
- Employee-related insurance will include health, accident, and workplace coverage, ensuring the safety and well-being of all staff.

f. Employee Motivation/ Rewards

YouthFin values its employees as its greatest asset. The company will implement a performance-based bonus system and offer career development opportunities such as training and leadership programs. To build a healthy and positive work culture, team-building sessions, annual retreats, and recognition awards will be organized regularly to celebrate employee achievements.

g. Employee Welfare, Health & Safety Management

YouthFin will maintain a safe and inclusive working environment following national health and safety standards. Regular safety audits and workplace checks will be conducted to ensure compliance. Employees will have access to health insurance, wellness programs, and mental health support, promoting a balanced and productive work atmosphere.

h. Administration Cost

Type of Expenses	**Expenses (Year 01)**	**Expenses (Year 02)**	**Expenses (Year 03)**
Office staff salaries (Annex VI)	3,180,000	3,450,000	3,900,000
Electricity bill	120,000	150,000	180,000
Water bill	36,000	42,000	48,000
Telephone bill	90,000	110,000	130,000
Postage	24,000	30,000	36,000
Office space rent	300,000	360,000	420,000
Insurance	100,000	120,000	150,000
Total	3,850,000	4,262,000	4,864,000

7. Financial Plan

***a.* Cost of Project and Means of Finance**

Return on Investment (ROI) - (Net Profit / Investment) *100	341.7%	720.6%	1,323.3%

8. Key Assumptions

1. Revenue Assumptions
Sales revenue is based on the subscription, commission, and partnership income projected in Annex III.
Monthly revenue in Year 1 is assumed to be LKR 2.87 million, growing by 50% in Year 2 and another 50% in Year 3 due to user and merchant expansion.
Loan funds of LKR 1.1 million are received at the start of Year 1 to support setup and operations. No additional loans are projected for Years 2 and 3.

2. Cost Assumptions
Raw Material Cost includes cloud hosting, payment gateways, cybersecurity, and app maintenance (from Annex V). Costs increase by 20% annually.
Wages cover all production, administrative, and marketing staff salaries (Annex VI), increasing by 5%–10% per year to account for inflation and promotions.
Electricity, Water, Transport, and Rent are based on current commercial rates, increasing by 10% annually.
Marketing & Distribution Costs increase proportionally with sales to maintain brand awareness and user acquisition growth (Annex Marketing Table).
Depreciation is calculated on a straight-line basis for each asset category as per Annex V (Depreciation Schedule).

3. Loan and Financing Assumptions
The total investment of LKR 3.05 million is financed through equity (LKR 1.7 million) and borrowed funds (LKR 1.35 million) as shown in Annex IX.
The loan carries an interest rate of 16% per annum, repayable in equal instalments over 3 years. No additional external financing is required after the initial loan period.

4. Profitability & Tax
Income tax is estimated at 20% of profit before tax each year.
Net profit margins are projected to increase as operational efficiency improves and user acquisition cost decreases.
All figures are expressed in Sri Lankan Rupees (LKR) at current market prices, assuming no major inflationary shocks.

5. General Assumptions
YouthFin's operations commence at the start of Year 1 (2025).
The system achieves steady monthly user growth and full launch by Month 6.
No major currency fluctuations or policy changes affecting fintech or youth banking sectors are assumed.

Annexure I - Market Research (Customer and Competitor Analysis)

a) Customer Research

Customers	Types of Product Services Purchasing	Quantity, Frequency and Time of Purchasing	Why do they buy (Core Use)	Our Price	Competitors	Competitors' Price
Parents/Guardians	Smart child savings accounts, family dashboards, micro investment options	Sign up once, renew or upgrade annually	To help children learn saving habits and achieve financial goals responsibly	Free (Basic), LKR 500/month (Premium)	Traditional banks (e.g., HNB Youth Account, Seylan Tikiri Account)	Free, but limited features
Children/Teenagers (Ages 10–18)	Goal-based saving app, gamified learning, reward points	Daily/weekly engagement, continuous app use	Saving for personal goals (gadgets, education), and learn about money	Free (basic app)	None offering full youth financial education	N/A
Banks & Financial Partners	Youth financial inclusion partnerships, API integration	Per partnership basis, long-term agreement	To attract the next generation of customers and improve brand image	Revenue share (5%)	None in Sri Lanka focusing on this niche	N/A
Merchants (Education/Gadgets Sellers)	YouthFin merchant listing, discount & loyalty program	Ongoing (depends on sales volume)	To attract young buyers and parents for school-related purchases	3–5% commission per sale	E-commerce aggregators (Daraz, Kapruka)	5–10% commission

b) Competitor Analysis

Competitor	Products	Market share (%)	Value to the customers	Advertising & promotion	Strengths	Weaknesses
Traditional Banks (e.g., HNB, Commercial Bank, Seylan)	Minor savings accounts, school banking programs	60%	Secure savings, trusted institutions	School programs, TV/radio ads	Brand trust, physical branches	No withdrawal until 18, no digital interactivity, no learning tools
EdTech Platforms (e.g., DP Education, Guru.lk)	Educational content, online learning	20%	Accessible online learning	Social media, schools	Strong e-learning base	No finance-related learning or banking features
FinTech Apps (e.g., Genie, FriMi, iPay)	Digital wallets and payments	15%	Convenient digital payments	Digital ads, influencer marketing	Secure, fast transactions	Not designed for minors, lacks parental controls
NGOs & Gov. Initiatives (e.g., CBSL Financial Literacy Programs)	Financial literacy workshops	5%	Awareness building	Government campaigns	Free and social impact–oriented	Not continuous, lacks gamification and tech engagement

Annexure II - S.W.O.T. Analysis

List each of your business' strengths, weaknesses, opportunities, or threats in the table below and then outline how you plan to address each of the weaknesses/threats

Strengths	**Weaknesses**
• First-mover advantage in Sri Lanka's youth-focused financial education and fintech space. • Strategic partnerships with banks, schools, and merchants. • Innovative gamified learning approach that engages children and teenagers. • Long-term customer retention (users grow with the platform into adulthood.) • Strong social impact focus	• Heavy dependence on partner banks for account creation and financial operations. • Requires strong data privacy and cybersecurity measures to gain parental trust. • Limited financial autonomy for minors may slow transaction volume and engagement.
Opportunities	**Threats**
• Growing demand for digital financial literacy and youth empowerment programs. • Collaboration potential with educational institutions and government youth initiatives.	• Regulatory restrictions on financial transactions by minors. • Competition from traditional banks developing youth-friendly digital products. • Economic instability affecting household spending and investment behavior.

• Rising smartphone adoption and digital payment usage among families in Sri Lanka.	

How to Address Weaknesses and Threats

- Bank Dependency: Establish multiple banking and fintech partnerships; explore licensing for independent e-wallet operations.
- Parental Trust: Introduce strong parental controls, transparent dashboards, and data protection certifications.
- High Costs: Adopt phased rollouts and collaborate with schools and NGOs for cost-effective outreach.
- Regulatory Issues: Work closely with the Central Bank of Sri Lanka to ensure compliance and pilot-friendly frameworks.
- Cybersecurity: Implement bank-grade encryption and conduct regular third-party audits.
- Competition: Focus on continuous innovation, gamification, and exclusive merchant deals to maintain differentiation.

Annexure III – Monthly Sales Forecast

Training & Financial Education Material	12	Educational Content Design & Printing	12	20,000	240,000	300,000	360,000
		Online Learning Modules	12	15,000	180,000	240,000	300,000
		Sub Total			***420,000***	***540,000***	***660,000***
Total Raw Material / Input Cost					***4,380,000***	***5,330,000***	***6,320,000***

Annexure VI – Labor Requirement/ Annual Labor Cost Calculation

Description	Existing No. of Workers	Expected No. of New Workers	Total No. of Workers (a)	Monthly Rate Per Worker (b)	Annual Labor Cost (Year 1) (a)*(b)*12	Annual Labor Cost (Year 2)	Annual Labor Cost (Year 3)
A. Production							
Developers / Designers / QA Staff	3	2	5	60,000	3,600,000	3,780,000	3,969,000
Technical Support (Platform Maintenance)	2	1	3	50,000	1,800,000	1,890,000	1,984,500
Total Production Labor Cost					**5,400,000**	**5,670,000**	**5,953,500**
B. Admin							
Administrative & Finance Staff	2	1	3	55,000	1,980,000	2,100,000	2,400,000
HR & Legal Coordination	1	1	2	50,000	1,200,000	1,350,000	1,500,000
Total Admin Staff Cost (Page 12)					**3,180,000**	**3,450,000**	**3,900,000**
C. Marketing							

Digital Marketing & Branding Staff	2	1	3	60,000	2,160,000	2,400,000	2,700,000
Partner & School Outreach Coordinators	1	1	2	50,000	1,200,000	1,350,000	1,500,000
Total Marketing Staff Cost (Page 08)					**3,360,000**	**3,750,000**	**4,200,000**

Annexure VII – Depreciation

Assets	Cost	Life span	Year 1 (Cost/ Life span)	Year 2 (Cost/ Life span)	Year 3 (Cost/ Life span)
Building	300,000	10	30,000	27,000	24,000
Machinery & Equipment	400,000	8	50,000	45,000	40,500
Furniture & Fittings	150,000	5	30,000	24,000	19,200
motor Vehicle	250,000	8	31,250	28,000	25,000
Other Equipment	1,200,000	5	240,000	200,000	160,000

Annexure VIII – Loan Instalment Calculation

Installment No	Opening Balance (A)	Capital payment (B)	Closing Balance (A-B)	Interest (C)	Total Repayment (Capital Payment + Interest) (B+C)
1	1,100,000	26,446	1,073,554	6,167	35,613
2	1,073,554	26,666	1,046,888	8,646	35,613
3	1,046,888	26,886	1,016,666	8,724	35,613
